**De-classification of Syn-O-Ad 8499  
(CAS 68937-40-6)**

Dear valued customer

As part of ICL-IP's on going commitment to the principles of product stewardship and customer service, the Safety Data Sheet (SDS) as well as the labels for Syn-O-Ad 8499 will be revised to reflect the change in the classification of the product effective immediately.

**The old classification of Syn-O-Ad 8499 was:**

**H411 - Toxic to aquatic life with long lasting effects, having “warning” as signal word;  
Class 9-Miscellaneous Dangerous Substances and articles, UN No. 3082, Marine  
Pollutant marking.**

**The new classification of Syn-O-Ad 8499 is: Not classified and not regulated for  
transportation.**

The previous criteria for classification was based on percentage of Triphenyl phosphate (CAS 115-86-6), a marine pollutant, in the mixture. The de-classification is based on aquatic studies conducted on the product itself (**Syn-O-Ad 8499**).

**According to the new criteria, Syn-O-Ad 8499 is not classified for transportation under  
IMDG, ADR, IATA and DOT regulations.**

**Please be advised that, during a transition period, you may still receive product labeled  
according to the previous classification.**
